

Index

A

Adaptive Group Testing, 2
Application DoS attack, 13
Application DoS defense, 30
Arriving request, 30
Asymmetric response time delay, 59
Attack mode, 33
Average response time, 30, 36

B

Back-end server, 30

C

CAPTCHA-based, 14
Carrier sensing time, 42
Channel surfing, 41
Clique independent set, 62–64
Connected group testing, 83

D

(d, z) -disjunct matrix, 8
 d -disjunct matrix, 3, 23, 43
 d -disjunct matrix construction, 5
 z -error correcting model, 8
D'yachkov-Rykov lower bound, 25
Danger mode, 33
DDoS shield, 14
Decoding algorithm, 4
Denial-of-Service (DoS) attack, 13
Denial-of-service attack, 13
Disjoint disk cover, 47
DoS Detection system configuration, 30

E

Empirical rule, 32
Encrypted token, 30
Error probability, 71
Error tolerance, 8
Error tolerant decoding algorithm, 8
Error tolerant randomized non-adaptive group testing, 60
Estimated response time, 32

F

False negative, 7, 72
False positive, 7, 72
Frequency hopping, 41

G

Group Testing, 1
Group testing based model, 15

H

Hamming distance, 8
Helly circular-arc graph, 64

I

Identifying Trigger Nodes (ITN) algorithm, 47
Independent probability, 71
Induced graph, 70
Interference Free Group Testing (IFGT), 47
Interference free testing team, 43, 47, 64

J

Jammed area, 42
Jammer distance, 44
Jamming range, 44, 46

L

Legitimate profile, 32
Local refinement, 66

M

Matrix distribution, 30–31
Maximal clique, 64, 66
Maximum clique, 45
Maximum independent set, 62

N

Network-based defense systems, 14
Node classification, 45
Non-adaptive Group Testing, 3
Non-adaptive group testing detection, 47–48

P

Packet delivery ratio, 42
Partial non-adaptive detection (PND) algorithm, 23
Piggyback, 30
Proactive jamming, 42
Probabilistic attack, 59, 70

R

Random incidence construction, 60
Randomized construction, 29
Reactive jamming attacks, 41
Receiver signal strength, 42

S

Scanning disk, 64
SDoP, 23
SDP, 23
Sequential detection with packing (SDP) algorithm, 17
Sequential detection without packing (SDoP) algorithm, 20
Sequential Group Testing, 2
Service resource usage, 36
Signal noise ratio, 44
Size constraint group testing, 14, 17
Strongly chordal graph, 64

T

Testing period, 31
Time complexity, 68
Tokens distribution, 31
Transfer threshold, 32
Triggering range, 44, 68

V

Variant reaction time, 72
Variant response time delay, 70
Virtual server, 16, 31
