

Subject Index

- Admittance, driving point 228
- , input 104, 120, 223
- Antenna, critically damped 167
- current, harmonic 205–207
- current, time dependent 199
- directivity 192
- , effective area 189
- , effective height 184, 186
- , equivalent circuit 188
- , far field 166, 219, 226, 231
- , Hertzian dipole 233
- , infinite 228
- , linear, reflectionless 198, 199, 205
- loading 199, 212, 232
- , receiving 188
- thin wire approximation 195
- transfer function 194, 208
- , transmitting 184
- , traveling wave 186
- waveform 200, 202–204, 211
- Aperture distribution 69
- Asymptotic expansion 27
- evaluation 61
- —, high frequency 47, 246
- method 31

- Basis function** (see Eigenfunctions and Numerical methods)
- Bessel function 47, 231, 252
- —, numerical evaluation 256
- Boundary condition 7
- —, Neumann 38
- Branch point singularities 34, 56, 131
- Brewster angle 253

- Cauchy integral formula 171
- Causality 15, 81, 125, 147
- Caustic 38
- Central difference 96
- Characteristic curves 224
- Cylinder, inclined, with ground plane 156
- , sphere-capped 111

- , triangular 3
- , vertical, with ground plane 154
- Completeness relation 38
- Complex frequency 130
- — plane 56
- Cone 47
- , diffracted ray 39
- Conjugate symmetry 134
- —, combined 136
- Constitutive parameters 7
- Contour integral method 31
- — —, natural frequency 171
- Corner reflector 108
- Coupled equations, first order 10
- Coupling coefficient 130, 143, 146, 147, 162
- vector 143, 145
- Critical angle 51, 253
- Current density 7, 144
- —, combined 135
- —, driving point 223, 226, 227
- —, input 187
- —, probe 191
- —, received 190

- Debye relaxation** 241
- Delta function** 12
- Diffraction pattern 50, 146
- Diffusion approximation 250
- Dipole antenna 106, 119
- Discontinuity, spatial 7
- , temporal 8
- , wavefront 29
- Disk 112, 154
- Dispersion 3
- equation 36
- , geological 238
- , plasma 11, 60
- surface 36

- Early-time response** 28, 30, 45, 50, 52, 59, 214, 247
- Edge condition** 8

- Eigenfunction expansion 16, 40, 174
 — —, four variables 18
 — —, oscillatory 41
 — —, three variables 19
 Eikonal 26
 Equiphasic surface 26
 Equivalent circuit 173
 — —, antenna 188

 Fermat's principle 26
 Field, electric 5
 —, combined 135
 —, far zone, time-domain 184
 —, high frequency 26
 —, magnetic 5
 — maximum, spatial 62
 — maximum, temporal 62, 64
 — natural mode 164
 — representations 78, 103, 218
 Field equations, Euler 9
 — —, Maxwell 5, 75, 184
 Finite-size bodies 138
 Flux density, electric 5
 —, magnetic 5
 Focusing 66
 —, imperfect 66
 —, perfect 66
 Fourier transform 184, 193
 — —, fast 120
 — integral 23
 Free oscillation 130
 Frequency spectrum 194

 Gaussian pulse 61, 63
 — beam 71
 — wavepacket 71
 Geometrical theory of diffraction 45
 Geometric optical field 46
 Green's functions, dyadic 12, 138
 — —, dyadic, electric 13
 — —, dyadic, magnetic 14
 — —, dyadic, transfer 14
 — —, scalar 15, 83
 Ground wave 254
 Group velocity 36, 60, 64, 65

 Half space, dielectric 51, 261
 — —, isotropic plasma 60
 — —, lossy, dispersive 261
 Hankel function 49, 252
 High-frequency field 26
 — —, asymptotic approximation 47
 Hybrid geometries 124

 Image source 43, 254
 Impedance, input 103, 184
 — loading 174
 — operator 174
 Initial conditions 7
 Integral equation
 — —, cylindrical structures 82
 — —, dyadic kernel 136
 — —, electric field (EFIE) 78
 — —, frequency domain 79, 113, 136
 — —, Hallén 195
 — —, magnetic field (MFIE) 79
 — —, numerical solution 86, 93, 219
 — —, one-dimensional wire 84
 — —, space-time 215
 — —, time domain 75, 222
 — —, two-dimensional 83
 Integral inversion, explicit 24
 —, Fourier 23, 184
 —, Laplace 22
 — —, lossy medium 246
 Interference maximum 36
 Interpolation, Lagrangian 91
 —, second order 87

 Laplace transform 23, 130, 245
 — —, numerical evaluation 245
 Lateral wave 51, 60, 257
 Legendre function 49
 Line source
 — —, harmonic 57
 — —, transient 51
 Local plane wave 26
 — oscillation frequency 55
 — wavelength 55
 Long-time response 43, 47, 56, 59

 Matrix equation 89, 92, 117
 —, circulant 117
 —, tridiagonal 93
 —, Vandermonde 117
 Medium, anisotropic 68
 —, dissipative 64, 243
 —, geological 238, 251
 —, half space 51, 243, 251
 —, homogeneous 14
 —, inhomogeneous 30
 —, plane stratified 33
 —, plasma 9
 —, realizable 241
 —, spatially dispersive 6, 11
 —, temporally dispersive 6, 11, 243
 —, time invariant 14

- Mixed derivative 97
- Mode amplitude 18
 - , cavity 134
 - function 18
 - , guided 21
 - , natural 130, 143
 - orthogonality 16
 - , oscillatory 19
- Moment method (MoM) 138, 196
- Monopole 121
- Muller's method 170

- Natural frequency 2, 10, 130, 143, 145, 151, 172
 - mode 130, 143, 145, 149, 160, 173
 - mode, far field 165
 - mode, retarded 165
- Newton's method 170
- Numerical methods 99, 123, 150, 196
 - —, accuracy of 99
 - —, analytic extrapolation in 110, 116
 - —, basis functions 90
 - —, computation time 99, 114
 - —, computer storage 115
 - —, deconvolution in 125
 - —, direct, time domain 227
 - —, extensions of 123
 - —, finite difference 94, 221
 - —, general applications 126
 - —, hybrid 133
 - —, instabilities 105
 - —, interpolation 87, 91
 - —, iterative 81, 96
 - —, moment 196
 - —, Muller 170
 - —, Newton 170
 - —, point matching 88
 - —, polynomial equation 117
 - —, Prony 117
 - —, sampling rate 99, 101
 - —, spatial sampling 100
 - —, spline functions 124
 - —, temporal sampling 100
 - —, time stepping 81, 85, 96, 221

- Permittivity operator 11
- Physical optics 74
- Plane interface 51
- Plane wave, pulsed 102, 150
 - —, local 26
 - —, nonuniform 34
- Plasma medium 9, 30, 54, 57, 60
 - frequency 10

- Point matching 88
- Pole singularities 19, 34, 56, 131
- Potential, Hertzian 252
 - , retarded 217, 81
 - , scalar 15, 76, 252
 - , vector 76, 93, 218
- Principal value integral 80
- Prolate spheroid 154
- Prony's method 117
- Propagation constant 139, 244
- Pulse, decaying step 245
 - , delta function 54, 101, 143
 - , frequency modulated 66
 - , Gaussian 61, 63, 101, 118, 194
 - , harmonic step 57
 - , rectangular 194
 - , step 58, 262

- Radiation condition** 138
 - vector 185
- Ray cone 39
 - , complex 38, 63
 - diagram 66
 - , diffracted 39
 - , signal 69
 - , space-time 36, 63
 - tube 27
- Reflection coefficient 52
- Residue evaluation 40, 57
- Resonant frequency 2, 130
 - pole 101, 141, 156, 159, 167
- Riemann surface 56
- Rock conductivity 238
 - complex dielectric constant 240
 - loss tangent 239
 - permittivity 239
 - polarization 239

- Saddle point 32, 56, 60
- Self-patch integral 92, 98
- Shadow boundary 47
- Shell-like scatterers 124
- Singularity expansion method 4, 116, 130
 - — —, branch points in 131
 - — —, conservation of singularities in 171
 - — — entire function in 131
 - — —, experimental data in 175
 - — —, poles in 131
- Slice generator 193
- Sommerfeld integral 25, 252
 - — numerical evaluation 255
- Space-time ray 36

- Space-time ray, complex 61, 62, 63
 - — diagram 58
- Spectral density 195
 - —, wave form of 200, 209
- Sphere 108, 110, 150, 153
- Standing wave 188
- Stationary point 32
- Steepest descent path 33, 56
- Surface current 7, 80, 143
 - charge 7, 135, 149
- Symmetric product 137

- Thin wire 89
 - —, bent 162
 - — cylinder 152, 164
 - — loop 105, 107
 - — modeling 123
- Tip condition 8, 50
- Total reflection 51
- Transition region 3
 - function 30
- Traveling wave 186

- Triangular cylinder 3
- Truncation effects, spatial 69
 - —, spectral 69

- Voltage, input 185
 - , open circuit 188
 - probe 190

- Waveform, damped sinusoid 105, 130, 175
 - , incident 143
 - , zero crossing time 213
- Wavefront 3
 - , cylindrical 3, 4
 - , diffracted 3, 4, 44, 48–50
 - , plane 102, 150
 - , reflected 3, 44
 - , spherical 49
- Wavepacket 3, 34, 36, 63, 65
 - , Gaussian 71
- Wedge 38, 44
- Wire structures (see Thin wire)
