- Barreiros 52
Bath smelter 2
BET surface area 58
Beta function 45
Biot-Savart law 62
Black box model 7
Blast smelting furnace 236
Boiler 102
Boundary condition 137
Boussinesq 16
Bubble assemblage model, BAM model 261
Bubble clouds 259
Bubble phase 259
Bubbling bed model 259
Bubbling fluidized bed 236
- C**
- CAD (computer-aided design) 318
CFD (Computational fluid dynamics) 6
Chaos 271
Circulating fluidized bed 236
Critical fluidization velocity 236
Cumulative probability function 33
- D**
- Damkohler number 46
Damping function 22
Dense phase 236
Diffusion term 17
Dilute phase 236
Dilute phase model 244
Direct exchanging area 31
Discrete transfer radiation model, DTRM 34
Dissipation rate 44
Dissipation rate of turbulent kinetic energy 252
Dissipation term 17
Double delta function 45
Dynamic simulation 127
- E**
- Eddy-break-up model, EBU model 45
Effective radiation 31
Electric cleaning furnace 193
Electric smelting furnace 175
Electrical conduction equation 153
Electrode paste 176
Elkem-D 178
Elkem-S 177
Elkem-3X 178
Elkem-T 178
