

List of Figures

| | | |
|-----|--|-----|
| 1.1 | Prices in a classic matching market | 14 |
| 3.1 | Acceptance probability for offer c in the ultimatum game | 43 |
| 3.2 | Split c^* proposed by an agent in the ultimatum game | 44 |
| 3.3 | Expected payoff of agent A in the ultimatum game | 45 |
| 3.4 | Expected payoff of agent A in the dictator game | 47 |
| 3.5 | Expected payoff of agent A in the “game of life” | 49 |
| 3.6 | Expected payoff of agent A in the “game of life” for several λ | 50 |
| 3.7 | The critical value $\lambda_0(\varepsilon_l)$ at which reciprocity ceases to be stable | 52 |
| 4.1 | Frequency distributions of price offers by proposers | 62 |
| 4.2 | Frequency distributions of surplus offered to responders | 63 |
| 4.3 | Frequency distributions of responders’ reservation prices | 65 |
| 4.4 | Slide 1/4 of instructions | 76 |
| 4.5 | Slide 2/4 of instructions | 76 |
| 4.6 | Slide 3/4 of instructions | 77 |
| 4.7 | Slide 4/4 of instructions | 77 |
| 4.8 | Proposer form | 78 |
| 4.9 | Responder form | 79 |
| 5.1 | Kinked utility functions of seller and buyer | 85 |
| 5.2 | Equilibrium prices with fairness concern and discount factor $\delta = 0.95$ | 87 |
| 5.3 | Self-confirming price convention | 92 |
| 5.4 | ε -stable range and equilibrium prices | 95 |
| 5.5 | Ranges of approximately sustained reference prices | 96 |
| 6.1 | Prices for buyers and sellers holding distinct references—Example 1 | 107 |
| 6.2 | Prices for buyers and sellers holding distinct references—Example 2 | 108 |
| 6.3 | Prices for buyers and sellers holding distinct references—Example 3 | 108 |
| 6.4 | Prices when a mutant without fairness concern is in the market | 111 |
| 6.5 | Prices for a share of mutant buyers without fairness concern | 114 |

| | | |
|------|---|-----|
| 6.6 | Prices for mutant buyers at the limit—Example 1 | 116 |
| 6.7 | Prices for mutant buyers at the limit—Example 2 | 116 |
| 6.8 | Prices when buyers and sellers hold distinct discount factors | 119 |
| 6.9 | Prices when buyers hold heterogenous discount factors | 120 |
| 6.10 | Different forms of the utility functions without fairness | 122 |
| 6.11 | Different forms of the utility functions without fairness at the limit . . | 123 |
| 6.12 | Different forms of the utility functions with fairness concern | 124 |
| 6.13 | Different forms of the utility functions with fairness at the limit | 124 |
| 6.14 | Smooth utility functions | 125 |
| 6.15 | Prices for smooth utility functions | 125 |
| 6.16 | Prices for smooth utility functions at the limit | 126 |
| 6.17 | Prices for a model with one-time entry | 127 |
| 6.18 | Prices with one-sided incomplete information | 129 |
| 7.1 | Comparison of market prices with and without fairness concern | 142 |
| 7.2 | Trial results in comparison with standard and behavioral predictions . | 148 |
| 7.3 | Ultimatum game results of the pre-experimental stage | 149 |
| 7.4 | Prices by subject over periods—buyers | 150 |
| 7.5 | Prices by subject over periods—sellers | 151 |
| 7.6 | Predicted vs. actual market prices—fair vs. unfair subjects | 154 |
| 7.7 | Screenshot of header | 160 |
| 7.8 | Screenshot of matching info | 160 |
| 7.9 | Screenshot of matching example | 161 |
| 7.10 | Screenshot of price proposal entry | 162 |
| 7.11 | Screenshot of reservation price entry | 163 |
| 7.12 | Screenshot of bargaining outcomes | 164 |
| 7.13 | Screenshot of treatment results | 165 |

List of Tables

| | | |
|-----|--|-----|
| 4.1 | Treatment information and independent observations by role | 60 |
| 4.2 | Influence of references on the probability that a high price is offered . | 61 |
| 4.3 | Influence of references on price offers | 62 |
| 4.4 | Influence of references on the probability that a high price is accepted | 65 |
| 4.5 | Influence of references on reservation prices | 66 |
| 4.6 | Efficiency by treatment | 66 |
| 4.7 | Treatment information and independent observations by role | 71 |
| 4.8 | Potential price offers | 72 |
| | | |
| 7.1 | Confidence intervals for λ after i observations | 146 |
| 7.2 | Treatments and number of periods each market lasted | 147 |
| 7.3 | Observed prices relative to standard prediction | 148 |
| 7.4 | Actions and classifications of subjects | 152 |
| 7.5 | Market prices by <i>not</i> fair-minded subjects | 153 |
| 7.6 | Market prices by fair subjects relative to behavioral prediction | 154 |

Index

- adaptive behavior, 149
- allocations, 7
- allocative efficiency, 66
- alternating offers, 11
- altruism, 23, 28, 36
