

Index

π^0 meson, 23

A

Acceleration
 gravitational, 75
 transformation of
Acceleration suppression, 19, 21
Alpha decay, 27
 energy and momentum
 conservation in, 68

B

Bell's thought experiment, 62
Beta-decay, 68

C

Causality paradox, 45, 47
Charge conservation
Coordinate system, 1, 29, 38
 attached, 29, 33, 56
Coordinate time, 29, 31, 32, 34,
 51–54, 90
 in accelerated frame
 of reference
 on the Earth, 60
 on the rotating disc
Coulomb-force, 70

D

Doppler-effect, 4, 50, 69, 90
 longitudinal, 7
 transverse, 7, 85
Drag, 83

E

Eötvös, 76
Einstein lift, 81, 83
Einstein, 2, 8, 22, 25, 69, 78, 82, 89, 91
Einstein-equations, 78
Electric moment
 acquired by moving
 magnetic moment
Electromagnetic field
 transformation of
Energy, 26
Energy conservation, 26
Energy–momentum
 four vector, 68
Energy-momentum tensor, 78
Equation of motion
 Newtonian, 3, 17, 77
 in accelerating frame
 of a point charge, 70
 relativistic, 19
Equivalence principle, 77, 78,
 81, 83
Ether, 89
Event(s), 29
 lightlike pair of, 39
 spacelike pair of, 40, 48
 timelike pair of, 40, 47

F

Force
 Coriolis, 2
 inertial, 1, 78
 true, 2
Four-vector, 66
Frequency
 its constancy in static spacetime

G

- Galilei transformation, 40
- Galilei, G.
 - experiment with rolling balls
- Galilei-transformation, 34, 70
 - homogeneity
 - linearity of
- Gamow, G., 63
- General relativity, 3, 78
 - observable consequences of
- Geodesic, 77, 78
- Geodesic equation, 79
- Geodesic hypothesis, 78
- Geodesic precession, 82
- GPS, 53
- Gravitation
 - source of
- Gravitational field
 - nonexistence of
- Gravitational lensing, 83
- Gravitational red shift, 85, 86
 - Pound-Rebka experiment
- Gravity Probe A (GP-A) experiment, 52
- Gravity Probe B (GP-B) experiment
- Gyroscope, 32, 71, 81
 - optical, 72

I

- Ideal clock, 30, 52
- Inertial frames, 1, 2, 31, 34, 78
 - equivalence of, 3, 14
 - global, 79, 80
 - for planetary motion, 80
 - isolated, 2
 - local, 79, 83
 - relative motion of
- Instantaneous rest frame, 14, 17, 51
- Internal combustion engine, 25
- Internal energy, *see* rest energy

K

- Kaufmann experiments, 19
- Kinetic energy, 20, 23, 25, 67
 - Newtonian, 21
 - relativistic, 21

L

- Le Verrier, 84
- Length, 13, 14, 30, 37, 43, 52, 54, 59, 61–64, 76, 89, 94, 96–99
 - vs distance, 17

Light

- corpuscular theory of, 83
- Light cone, 43, 44
- Light deflection, 27, 83
 - as refraction, 84
- Light speed *see* speed of light, 3, 31, 33, 34, 70, 80, 90
- Light velocity
 - isotropy, 2, 33, 34
 - on Earth
- Lightlike future and past, 43
- Logical contradiction, 8, 46
- Lorentz contraction, 13–15, 19, 39, 60–64, 90, 98
- Lorentz, H. A., 90
- Lorentz-force, 71
- Lorentz-transformation, 27, 34, 35, 43, 44, 64–67
 - linearity and homogeneity, 37

M

- Manifold, 38, 39, 77, 78
 - euclidean and pseudoeuclidean, 40
- Mars rover, 9, 44, 80
- Mass, 17, 20, 22, 23, 25–27, 38, 40
 - inertial and gravitational, 75, 79
 - equality of, 76
 - invariance of, 48, 54, 70
 - longitudinal and transversal, 71
- Mass conservation, 25, 26
 - popular view on
- Mass–energy relation, 20, 23, 24, 26, 27, 38, 67, 68
 - popular view on, 26, 84, 87
- Massless particles, 68, 69
 - transformation of the energy of
- Maxwell equations, 2, 70
 - in Minkowski coordinates, 34
- Metric, 38
- Michelson–Morley experiment, 69, 70, 89, 90
- Miller, C., 90
- Minkowski coordinates, 33, 34, 38, 52, 54, 80
- Minkowski diagram, *see* spacetime diagram
- Momentum, 19
- Momentum conservation, 23, 68

N

- Newcomb, S., 84
- Newton's law, 82, 91
- Newtonian time, 12

P

Penrose–Terrel effect, 64
 Perihelion precession, 84
 Photon, 69
 relativistic mass of, 84
 Planck-constant, 69
 Positronium, 23
 Proper time, 11, 12, 17, 18, 32, 37,
 51–53, 55, 96
 influenced by gravitation
 invariance of
 Pseudorotation

R

Rate of change of the distance, 15, 64
 Red shift, *see* gravitational red shift
 Reference frames
 accelerating, 34, 59
 Relative velocity, 15, 64
 Relativistic mass, 20, 26
 fallacy, 20
 Relativity of simultaneity, *see* simultaneity
 Rest energy, 22, 25, 67, 78n
 Rest mass, 20
 Rotating disc, 59, 71

S

Sagnac effect, 3n, 72, 73
 Simultaneity, 8, 9, 13, 14, 39, 48, 49, 61, 80,
 90, 98
 interval of, 10, 11, 44, 80
 Soldner von, J. G., 83
 Spacetime, 29
 as manifold, *see* manifold
 curved, 77, 86
 domains in, 43
 Spacetime diagram, 40, 47, 48, 61
 nonrelativistic
 parallel projection on, 41, 44
 relativistic, 42
 scales on, 41, 43
 Spacetime intervals, 39, 68
 on spacetime diagrams, 42
 Special relativity
 first postulate of, 3, 72
 refutability of, 89, 90
 second postulate of, 10
 Speed of light, 3, 54
 constancy of, 3, 31–33, 70, 90
 in general relativity, 79
 measurement of, 3
 reflected from moving mirror, 72

Speed of time

 slowing down by gravitation, 87
 Squared distance, 38, 51
 invariance of, 38
 Standard setting, 32–35
 freedom in, 35
 Superluminal signal, 45, 47
 Synchronization, 31
 Einsteinian, V, 27, 31, 32, 34, 38, 54
 circularity of, 32
 in accelerating frame of reference, 54, 80
 in general relativity, 80
 method of, 30
 Newtonian, 31, 32, 34
 subtleties of, 52

T

Tachyon, 48
 Thomas-precession, 71, 72n
 Time dilation, V, 7, 19, 20, 31, 59, 85, 90, 91,
 94, 98
 symmetry of, 8, 48
 Timelike future and past, 44
 Tompkins, Mr, 63
 Total energy, 23, 26
 Tower effect, 87
 Train thought experiment, 9, 14, 36, 37, 40, 94
 Twin paradox, 12, 31, 31n, 52, 53
 as seen by the accelerating twin, 12, 53–59
 the magnitude of, 52, 54

U

Universal gravity law, 78, 83

V

Velocity addition formula, V, 15, 16, 18n, 46,
 64, 98
 Velocity reversal, 55
 lasting effect, 58
 deformation, 59
 desynchronization, 58
 vernal equinox
 displacement of, 84n
 Virtual clocks, 33
 set S of, 32, 33

W

Wave packet, 27
 energy and momentum, 22
 Weight, 75, 78, 81

W (*cont.*)Weightlessness, [76](#), [78](#)World line, [40](#), [77](#)**Z**Zero mass particles, *see* massless particles
