

# Publications of Charles M. Newman

1. Newman, C.M.: The inner product of path space measures corresponding to random processes with independent increments. *Bulletin of the American Mathematical Society* **78**(2), 268–271 (1972)
2. Newman, C.M.: Ultralocal quantum field theory in terms of currents. I. the free theory. *Communications in Mathematical Physics* **26**(3), 169–204 (1972)
3. Newman, C.M.: Nondiscrete spins and the Lee–Yang Theorem. In: G. Velo, A. Wightman (eds.) *Constructive Quantum Field Theory*, pp. 321–325. Springer–Verlag, Berlin–Heidelberg–New York (1973)
4. Newman, C.M.: On the orthogonality of independent increment processes. In: D.W. Stroock, S.R.S. Varadhan (eds.) *Topics in Probability Theory*, pp. 93–112. Courant Institute of Mathematical Sciences, New York (1973)
5. Newman, C.M.: The construction of stationary two-dimensional Markoff fields with an application to quantum field theory. *Journal of Functional Analysis* **14**(1), 44–61 (1973)
6. Lenard, A., Newman, C.M.: Infinite volume asymptotics in  $P(\varphi)_2$  field theory. *Communications in Mathematical Physics* **39**(3), 243–250 (1974)
7. Newman, C.M.: Zeros of the partition function for generalized Ising systems. *Communications on Pure and Applied Mathematics* **27**(2), 143–159 (1974)
8. Bennett, G., Goodman, V., Newman, C.M.: Norms of random matrices. *Pacific J. Math.* **59**(2), 359–365 (1975)
9. Dunlop, F., Newman, C.M.: Multicomponent field theories and classical rotators. *Communications in Mathematical Physics* **44**(3), 223–235 (1975)
10. Newman, C.M.: An extension of Khintchine’s inequality. *Bulletin of the American Mathematical Society* **81**(5), 913–915 (1975)
11. Newman, C.M.: Gaussian correlation inequalities for ferromagnets. *Zeitschrift für Wahrscheinlichkeitstheorie und Verwandte Gebiete* **33**(2), 75–93 (1975)
12. Newman, C.M.: Inequalities for Ising models and field theories which obey the Lee–Yang Theorem. *Communications in Mathematical Physics* **41**(1), 1–9 (1975)

13. Newman, C.M.: Moment inequalities for ferromagnetic Gibbs distributions. *Journal of Mathematical Physics* **16**(9), 1956–1959 (1975)
14. Ellis, R.S., Monroe, J.L., Newman, C.M.: The GHS and other correlation inequalities for a class of even ferromagnets. *Communications in Mathematical Physics* **46**(2), 167–182 (1976)
15. Ellis, R.S., Newman, C.M.: Quantum mechanical soft springs and reverse correlation inequalities. *Journal of Mathematical Physics* **17**(9), 1682–1683 (1976)
16. Newman, C.M.: Classifying general Ising models. In: F. Guerra, D.W. Robinson, R. Stora (eds.) *Proceedings, Les méthodes mathématiques de la théorie quantique des champs: Marseille, France, June 23–27, 1975*, pp. 273–288. C.N.R.S., Paris (1976)
17. Newman, C.M.: Fourier transforms with only real zeros. *Proceedings of the American Mathematical Society* **61**(2), 245–251 (1976)
18. Newman, C.M.: Rigorous results for general Ising ferromagnets. *Journal of Statistical Physics* **15**(5), 399–406 (1976)
19. Bennett, G., Dor, L.E., Goodman, V., Johnson, W.B., Newman, C.M.: On uncomplemented subspaces of  $L_p$ ,  $1 < p < 2$ . *Israel Journal of Mathematics* **26**(2), 178–187 (1977)
20. Newman, C.M., Schulman, L.S.: Metastability and the analytic continuation of eigenvalues. *Journal of Mathematical Physics* **18**(1), 23–30 (1977)
21. Ellis, R.S., Newman, C.M.: Extensions of the maximum principle: Exponential preservation by the heat equation. *Journal of Differential Equations* **30**(3), 365–379 (1978)
22. Ellis, R.S., Newman, C.M.: Fluctuations in Curie–Weiss exemplis. In: G. Dell’Antonio, S. Doplicher, G. Jona-Lasinio (eds.) *Mathematical Problems in Theoretical Physics: International Conference Held in Rome, June 6–15, 1977*, pp. 313–324. Springer–Verlag, Berlin–Heidelberg–New York (1978)
23. Ellis, R.S., Newman, C.M.: Limit theorems for sums of dependent random variables occurring in statistical mechanics. *Zeitschrift für Wahrscheinlichkeitstheorie und Verwandte Gebiete* **44**(2), 117–139 (1978)
24. Ellis, R.S., Newman, C.M.: Necessary and sufficient conditions for the GHS inequality with applications to analysis and probability. *Transactions of the American Mathematical Society* **237**, 83–99 (1978)
25. Ellis, R.S., Newman, C.M.: The statistics of Curie–Weiss models. *Journal of Statistical Physics* **19**(2), 149–161 (1978)
26. Newman, C.M.: Critical point inequalities and scaling limits. *Communications in Mathematical Physics* **66**(2), 181–196 (1979)
27. Newman, C.M.: Short distance scaling and the maximal degree of a field theory. *Physics Letters B* **83**(1), 63–66 (1979)
28. Newman, C.M., Stuck, B.W.: Chernoff bounds for discriminating between two Markov processes. *Stochastics* **2**(1–4), 139–153 (1979)

29. Newman, C.M., Stuck, B.W.: Optimal sampling of independent increment processes. *Stochastics* **2**(1–4), 213–225 (1979)
30. Ellis, R.S., Newman, C.M., Rosen, J.S.: Limit theorems for sums of dependent random variables occurring in statistical mechanics, II: conditioning, multiple phases, and metastability. *Zeitschrift für Wahrscheinlichkeitstheorie und Verwandte Gebiete* **51**(2), 153–169 (1980)
31. Newman, C.M.: Normal fluctuations and the FKG inequalities. *Communications in Mathematical Physics* **74**(2), 119–128 (1980)
32. Newman, C.M., Schulman, L.S.: Complex free energies and metastable lifetimes. *Journal of Statistical Physics* **23**(2), 131–148 (1980)
33. Ellis, R.S., Newman, C.M., O’Connell, M.R.: The GHS inequality for a large external field. *Journal of Statistical Physics* **26**(1), 37–52 (1981)
34. Newman, C.M.: Critical point dominance in one dimension. *Communications in Mathematical Physics* **79**(1), 133–140 (1981)
35. Newman, C.M.: Self-similar random fields in mathematical physics. In: G.A. Goldin, R.F. Wheeler (eds.) *Measure Theory and its Applications*, Proceedings of the 1980 Conference, pp. 93–119. Northern Illinois University, DeKalb (1981)
36. Newman, C.M., Schulman, L.S.: Infinite clusters in percolation models. *Journal of Statistical Physics* **26**(3), 613–628 (1981)
37. Newman, C.M., Schulman, L.S.: Number and density of percolating clusters. *Journal of Physics A: Mathematical and General* **14**(7), 1735–1743 (1981)
38. Newman, C.M., Wright, A.L.: An invariance principle for certain dependent sequences. *Annals of Probability* **9**(4), 671–675 (1981)
39. Newman, C.M., Schulman, L.S.: Asymptotic symmetry: Enhancement and stability. *Physical Review B* **26**, 3910–3914 (1982)
40. Newman, C.M., Wright, A.L.: Associated random variables and martingale inequalities. *Zeitschrift für Wahrscheinlichkeitstheorie und Verwandte Gebiete* **59**(3), 361–371 (1982)
41. Bhattacharya, R.N., Newman, C.M.: Fokker–Planck equations. In: S. Kotz, N. L. Johnson, C.B. Read (eds.) *Encyclopedia of Statistical Sciences*, vol. 3, pp. 159–160. Wiley, New York (1983)
42. Newman, C.M.: A general central limit theorem for FKG systems. *Communications in Mathematical Physics* **91**(1), 75–80 (1983)
43. Newman, C.M., Rinott, Y., Tversky, A.: Nearest neighbors and Voronoi regions in certain point processes. *Advances in Applied Probability* **15**(4), 726–751 (1983)
44. Tversky, A., Rinott, Y., Newman, C.M.: Nearest neighbor analysis of point processes: Applications to multidimensional scaling. *Journal of Mathematical Psychology* **27**(3), 235–250 (1983)
45. Aizenman, M., Newman, C.M.: Tree graph inequalities and critical behavior in percolation models. *Journal of Statistical Physics* **36**(1), 107–143 (1984)
46. Cohen, J.E., Newman, C.M.: The stability of large random matrices and their products. *Annals of Probability* **12**(2), 283–310 (1984)

47. Newman, C.M.: Asymptotic independence and limit theorems for positively and negatively dependent random variables. In: Y.L. Tong (ed.) *Inequalities in Statistics and Probability, Lecture Notes–Monograph Series*, vol. 5, pp. 127–140. Institute of Mathematical Statistics, Hayward, CA (1984)
48. Winter, C.L., Newman, C.M., Neuman, S.P.: A perturbation expansion for diffusion in a random velocity field. *SIAM Journal on Applied Mathematics* **44**(2), 411–424 (1984)
49. Chayes, J.T., Chayes, L., Newman, C.M.: The stochastic geometry of invasion percolation. *Communications in Mathematical Physics* **101**(3), 383–407 (1985)
50. Cohen, J.E., Hajnal, J., Newman, C.M.: Approaching consensus can be delicate when positions harden. *Stochastic Processes and their Applications* **22**(2), 315–322 (1986)
51. Cohen, J.E., Newman, C.M.: A stochastic theory of community food webs: I. Models and aggregated data. *Proceedings of the Royal Society of London. Series B, Biological Sciences* **224**(1237), 421–448 (1985)
52. Cohen, J.E., Newman, C.M.: When will a large complex system be stable? *Journal of Theoretical Biology* **113**(1), 153–156 (1985)
53. Cohen, J.E., Newman, C.M., Briand, F.: A stochastic theory of community food webs: II. Individual webs. *Proceedings of the Royal Society of London. Series B, Biological Sciences* **224** (1985)
54. Kipnis, C., Newman, C.M.: The metastable behavior of infrequently observed, weakly random, one-dimensional diffusion processes. *SIAM Journal on Applied Mathematics* **45**(6), 972–982 (1985)
55. Newman, C.M., Cohen, J.E., Kipnis, C.: Neo-darwinian evolution implies punctuated equilibria. *Nature* **315**, 400–401 (1985)
56. Newman, C.M., Rinott, Y.: Nearest neighbors and Voronoi volumes in high-dimensional point processes with various distance functions. *Advances in Applied Probability* **17**(4), 794–809 (1985)
57. Newman, C.M., Schulman, L.S.: Infinite chains and clusters in one dimensional directed and undirected percolation. In: R. Durrett (ed.) *Particle systems, random media, and large deviations, Contemporary Mathematics*, vol. 41, pp. 297–313. American Mathematical Society (1985)
58. Aizenman, M., Newman, C.M.: Discontinuity of the percolation density in one-dimensional  $1/|x - y|^2$  percolation models. *Communications in Mathematical Physics* **107**(4), 611–647 (1986)
59. Cohen, J.E., Briand, F., Newman, C.M.: A stochastic theory of community food webs. III. Predicted and observed lengths of food chains. *Proceedings of the Royal Society of London. Series B. Biological Sciences* **228**(1252), 317–353 (1986)
60. Cohen, J.E., Kesten, H., Newman, C.M. (eds.): *Random matrices and their applications, Contemporary Mathematics*, vol. 50. American Mathematical Society (1986)

61. Newman, C.M.: Lyapunov exponents for some products of random matrices: Exact expressions and asymptotic distributions. In: J.E. Cohen, H. Kesten, C.M. Newman (eds.) Random matrices and their applications, *Contemporary Mathematics*, vol. 50, pp. 121–141. American Mathematical Society (1986)
62. Newman, C.M.: Percolation theory: A selective survey of rigorous results. In: G. Papanicolaou (ed.) Advances in multiphase flow and related problems, pp. 147–167. SIAM, Philadelphia (1986)
63. Newman, C.M.: Some critical exponent inequalities for percolation. *Journal of Statistical Physics* **45**(3), 359–368 (1986)
64. Newman, C.M.: The distribution of Lyapunov exponents: exact results for random matrices. *Communications in Mathematical Physics* **103**(1), 121–126 (1986)
65. Newman, C.M., Cohen, J.E.: A stochastic theory of community food webs. IV. Theory of food chain lengths in large webs. *Proceedings of the Royal Society of London. Series B. Biological Sciences* **228**(1252), 355–377 (1986)
66. Newman, C.M., Schulman, L.S.: One dimensional  $1/|j - i|^s$  percolation models: The existence of a transition for  $s \leq 2$ . *Communications in Mathematical Physics* **104**(4), 547–571 (1986)
67. Aizenman, M., Chayes, J.T., Chayes, L., Newman, C.M.: The phase boundary in dilute and random Ising and Potts ferromagnets. *Journal of Physics A: Mathematical and General* **20**(5), L313–L318 (1987)
68. Aizenman, M., Kesten, H., Newman, C.M.: Uniqueness of the infinite cluster and continuity of connectivity functions for short and long range percolation. *Communications in Mathematical Physics* **111**(4), 505–531 (1987)
