

HUMAN IDENTIFICATION: THE USE OF DNA MARKERS

Contemporary Issues in Genetics and Evolution

VOLUME 4

The titles published in this series are listed at the end of this volume.

Human Identification: The Use of DNA Markers

Edited by
BRUCE S. WEIR

Contributions with an asterisk in the table of contents were first published in *Genetica*, Volume 96 no. 1-2 (1995)

Springer-Science+Business Media, B.V.

Library of Congress Cataloging-in-Publication Data

Human identification : the use of DNA markers / edited by Bruce S. Weir.
p. cm. -- (Contemporary issues in genetic and evolution ; v. 4)
Includes bibliographical references and index.
ISBN 978-94-017-1803-5 ISBN 978-0-306-46851-3 (eBook)
DOI 10.1007/978-0-306-46851-3
1. DNA fingerprinting. I. Weir, B. S. (Bruce S.), 1943--
II. Series.
RA1057.55.H85 1995

Contents

* Introduction by B.S. Weir	1
* D.J. Balding and R.A. Nichols, A method for quantifying differentiation between populations at multi-allelic loci and its implications for investigating identity and paternity	3
* J.F.Y. Brookfield, The effect of relatedness on likelihood ratios and the use of conservative estimates	13
* B. Budowle, The effects of inbreeding on DNA profile frequency estimates using PCR-based loci	21
* R. Chakraborty and Z. Li, Correlation of DNA fragment sizes within loci in the presence of non-detectable alleles	27
* A.G. Clark, J.F. Hamilton and G.K. Chambers, Inference of population subdivision from the VNTR distributions of New Zealanders	37
* R.N. Curnow, Conditioning on the number of bands in interpreting matches of multilocus DNA profiles	51
* P. Donnelly, Match probability calculations for multi-locus DNA profiles	55
* P. Gill and I. Evett, Population genetics of short tandem repeat (STR) loci	69
* D.W. Gjerfson and J.W. Morris, Assessing probability of paternity and the product rule in DNA systems	89
* D.H. Kaye, The forensic debut of the NRC's DNA report: population structure, ceiling frequencies and the need for numbers	99
* K. Lange, Applications of the Dirichlet distribution to forensic match probabilities	107
* R. Lempert, The honest scientist's guide to DNA evidence	119
* P.J. Maiste and B.S. Weir, A comparison of tests for independence in the FBI RFLP data bases	125
* N.E. Morton, Alternative approaches to population structure	139
* B. Robertson and G.A. Vignaux, DNA evidence: wrong answers or wrong questions?	145
* W.C. Thompson, Subjective interpretation, laboratory error and the value of forensic DNA evidence: three case studies	153
* D. Zaykin, L. Zhivotovsky and B.S. Weir, Exact tests for association between alleles at arbitrary numbers of loci	169
B.S. Weir, A bibliography for the use of DNA in human identification	179
* Contributions indicated with an asterisk were first published in <i>Genetica</i> , Volume 96 no. 1–2 (1995).
