

THE SCIENTIFIC ARTICLE IN THE AGE OF DIGITIZATION

Information Science and Knowledge Management

Volume 11

Editor-in-Chief:

J. Mackenzie Owen, *University of Amsterdam, The Netherlands*

Editorial Board:

M. Bates, *University of California, Los Angeles*

P. Bruza, *The University of Queensland, Brisbane*

R. Capurro, *Hochschule der Medien, Stuttgart University of Applied Sciences, Stuttgart*

E. Davenport, *Napier University, Edinburgh*

R. Day, *Wayne State University, Detroit*

M. Hedstrom, *University of Michigan, Ann Arbor*

A.M. Paci, *Istituto di Studi Sulla Ricerca e Documentazione Scientifica, Roma*

C. Tenopir, *University of Tennessee, Knoxville*

M. Thelwall, *University of Wolverhampton, Wolverhampton*

THE SCIENTIFIC ARTICLE IN THE AGE OF DIGITIZATION

by

JOHN MACKENZIE OWEN

Contents

List of Figures	ix
List of Tables	xi
1. INTRODUCTION	1
1 The birth of the electronic journal	1
2 The electronic journal ‘revolution’	5
3 Electronic journals: the issues	8
4 Studying digitization	11
5 Information Science	13
6 Theory	15
7 Methodology	18
8 Level of analysis	19
9 Outline	21
2. THE DEVELOPMENT OF SCIENTIFIC COMMUNICATION	23
1 The historical perspective	24
1.1 The Scientific Revolution	25
1.2 The early impact of printing	27
1.3 The scientific societies	28
1.4 The scientific journal	31
1.5 The development of the electronic journal	34
2 The scientific journal	37
2.1 The structure of the scientific article	38
2.2 The evolution of the scientific article	41

3.	THE SCIENTIFIC COMMUNICATION SYSTEM	45
1	Scientific communication	45
2	Models and metaphors	47
2.1	The conduit metaphor	48
2.2	The information chain	50
3	Early models	52
4	Transaction space	56
5	Continuum model	60
6	Functions of scientific communication	63
7	The author	66
8	From print to digital	71
8.1	The digital information chain	71
8.2	Systems based communication	76
8.3	Institutional repositories	80
9	Innovation of the scientific journal	83
9.1	Scholarly Communication Forums	84
9.2	The innovation chain	85
10	Complexity of scientific communication	89
4.	THE DIGITIZATION OF INFORMATION RESOURCES	93
1	Introduction	93
2	The concept of digitization	94
3	Networked information	97
4	Dynamic information	101
5	Quasi-intelligent documents	107
6	The functional document	116
7	The 'copy paradox'	118
8	The problem of authenticity	120
9	Reading, creating and control	125
10	Characterizing the digital article	128
10.1	The digital document	128
10.2	The digital scientific article	129
5.	THE ELECTRONIC JOURNAL 1987-2004	131
1	Analytical framework	131
2	Research data	135

3	Results of the survey	138
3.1	Scientific fields and publication year	138
3.2	Submission formats	140
3.3	Publication formats	142
3.4	Multimedia	143
3.5	Data resources	145
3.6	Revision	146
3.7	Response	147
3.8	Customization	149
3.9	External hyperlinks	151
3.10	Functionality	153
3.11	Navigation	154
3.12	Peer review	159
3.13	Copyright	161
3.14	Editorial policies	162
4	Open Access journals	167
5	Evaluation	171
6	The impact of digitization	177
6.	DIGITIZATION AND THE EVOLUTION OF SCIENTIFIC COMMUNICATION	191
1	Explaining development	191
1.1	The closure of scientific communication	191
1.2	An evolutionary view of scientific communication	197
1.3	The diffusion of innovations	201
2	The technology myth	210
3	Transforming scientific communication	214
3.1	The significance of the electronic journal	214
3.2	The illusion of new media	216
3.3	The shadow of the format	219
3.4	The epistemological position	220
4	The impact of digitization on scientific communication	221
4.1	The illusion of a revolution	221
4.2	The dynamics of change	222
5	Final conclusions	223
	Bibliography	227
	Index	259

List of Figures

1.1	The first electronic journal: New horizons in adult education	2
1.2	The first issue of Ejournal	3
1.3	Research domain	20
2.1	The three stages of e-journals	34
3.1	The information chain	51
3.2	The library as a clearinghouse	52
3.3	Lancaster's model of the information chain	55
3.4	Garvey-Griffith model of scientific communication	56
3.5	Scientific communication as a market for information	57
3.6	The dual market of scientific information	59
3.7	Life cycle model – hierarchical structure	62
3.8	A 3-phase model of research	66
3.9	The extended 3-phase model	68
3.10	Elaboration of the research process	69
3.11	Information sources in research	70
3.12	Aitchison's model of the information chain	73
3.13	Hurd's model for 2020	74
3.14	Aggregation in the digital information chain	75
3.15	Fjälbrant's model of scientific communication	76
3.16	Transformation of the information chain	77
3.17	The Scholar's Forum model	78
3.18	Print distribution	79
3.19	Digital distribution	79
3.20	Data-Services Repository Model	81
3.21	Repository-based communication	83

3.22	STIN model of scientific journal production	85
3.23	STIN model of an electronic journal	86
3.24	A socio-technical network of journal innovation	86
3.25	The innovation chain	88
3.26	Continuum of scientific publications	91
4.1	Global network access	100
4.2	Typed links	111
5.1	Research model	132
5.2	E-journals per year	140
5.3	E-journals per discipline	140
5.4	Comments in Journal of Corrosion Science and Engineering (JCSE)	148
5.5	Comments in JIME	150
5.6	Navigational devices in Journal of Inequalities in Pure and Applied Mathematics (JIPAM)	156
5.7	Navigational devices in Living Reviews Relativity (LRR)	157
5.8	Navigational devices in Journal of Interactive Media in Education (JIME)	158
5.9	PDF-version of Journal of Interactive Media in Education (JIME)	159
5.10	Peer review process in Journal of Interactive Media in Education (JIME)	161
5.11	Copyright policy of the Journal of Virtual Environments (JVE)	162
5.12	Features of BMC journals	170
5.13	BMC's Open Access policy	171
6.1	Closure and the scientific journal	196
6.2	Evolutionary model of the scientific article	200
6.3	Evolutionary pressures on the scientific article	201
6.4	Dynamics of change	222

List of Tables

1.1	Vickery's information science constructs	16
1.2	Outline of the book	21
2.1	A typology of the scientific article	39
2.2	The 20 th century structure of the scientific article	39
2.3	Formal elements of the scientific article	40
2.4	Discourse elements of the scientific article	41
3.1	Information genres in the UNISIST model	54
3.2	Functions in Lancaster's model	54
3.3	Time scales in scientific communication	57
3.4	Functions in the information chain	65
3.5	Research stages according to Garvey	70
4.1	Fundamental characteristics of digital networked information resources	99
4.2	Updating strategies	104
4.3	Adaptive strategies	105
4.4	Mutation forms	106
4.5	Dynamic information resource systems: outputs	115
4.6	Dynamic information resource systems: inputs	116
4.7	The characteristics of functional documents	118
4.8	The power structure of the networked information space	127
5.1	Article properties	133
5.2	Editorial policies	134
5.3	Research design	135
5.4	Sources of e-journals	136

5.5	Selection criteria	137
5.6	All disciplines	138
5.7	Humanities	139
5.8	Social sciences	139
5.9	Sciences	139
5.10	Submission formats	142
5.11	Publication formats	142
5.12	Types of multimedia	143
5.13	Multimedia per discipline (% of journals with multimedia)	144
5.14	Data resources in digital journals	146
5.15	Customization features in Internet Journal of Chemistry (IJC)	151
5.16	Links in html journals	152
5.17	Links in pdf journals	153
5.18	E-journal functions	154
5.19	Types of navigation	155
5.20	Editorial style rules	163
5.21	Selected BMC journals	168
5.22	Attachments in BMC journals	168
5.23	Summary of editorial policies	173
5.24	Summary of conclusions	174
5.25	Advantages of e-publishing	179
5.26	Expected features of e-journal articles	180
5.27	E-journal features according to McKiernan	180
6.1	Closure factors for the scientific journal	195
6.2	The process of technological innovation	202
