Cell and Tissue Culture in Forestry

Volume 1

General Principles and Biotechnology

edited by

J.M. BONGA and DON J. DURZAN

Canadian Forestry Service / University of California

Library of Congress Cataloging in Publication Data

Cell and tissue culture in forestry.

(Forestry sciences)

Rev. ed. of: Tissue culture in forestry. 1982.

Includes index.

Contents: v. 1. General principles and biotechnology

-- v. 2. Specific principles and methods.

1. Plant cell culture--Collected works. 2. Plant tissue culture--Collected works. 3. Forests and forestry--Collected works. I. Bonga, J. M. II. Durzan, D. J. III. Tissue culture in forestry. IV. Series.

SD403.5.C45 1987 634.9'56 86-23767

ISBN 978-90-481-8300-5

ISBN 978-94-017-0994-1 (eBook)

VOLUME 1

TABLE OF CONTENTS

List of contributors	XIII
1. INTRODUCTION	1
<u>MEDIA AND PHYSICAL ENVIRONMENT</u>	
2. GENERAL MEDIA AND VESSELS SUITABLE FOR WOODY PLANT CULTURE - B.H. McCown, and J.C. Sellmer	4
1. INTRODUCTION AND SCOPE	
2. BASIC MINERAL SALT FORMULATIONS AND SOME KEY DIFFERENCES	
2.1. Total ionic strength	
2.2. Total nitrogen levels	
2.3. Calcium deficiency in shoot culture: shoot-tip necrosis	
2.4. Chloride sensitivity	
3. VESSEL CHARACTERISTICS	
4. SOME INTERACTIONS OF INTEREST	
4.1. Mineral formulation x growth regulator effect	
4.2. Vitreous growth and media/vessel selection	
5. CONCLUDING REMARKS	
3. MICRONUTRIENTS - R.D. Teasdale	17
1. INTRODUCTION	
2. CHEMICAL BEHAVIOUR OF MICRONUTRIENTS	
2.1. Chemical speciation and media interactions	
2.2. Avoidance and removal of trace nutrients	
3. BIOLOGICAL ROLES AND REQUIREMENTS	
3.1. Essential cations	
3.1.1. Iron	
3.1.2. Copper	
3.1.3. Zinc	
3.1.4. Manganese	
3.1.5. Cobalt	
3.1.6. Nickel	
3.1.7. Sodium	
3.2. Essential anions	
3.2.1. Boron	
3.2.2. Molybdenum	
3.2.3. Chlorine	
3.2.4. Iodine	
3.3. Other microelements	
4. CONSIDERATIONS IN TISSUE CULTURE	
4.1. Media formulations	
4.2. Some considerations for physiological studies	
4.2.1. Stress application	
4.2.2. Growth analysis methods	
5. CONCLUDING REMARKS	

4. PLANT GROWTH REGULATORS AND MORPHOGENESIS IN CELL AND TISSUE CULTURE OF FOREST TREES - S.C. Minocha 50
1. INTRODUCTION
 2. PLANT GROWTH REGULATORS IN CELL AND TISSUE CULTURE
 - 2.1. Historical perspective
 - 2.2. Current status
 3. MODE OF ACTION OF GROWTH REGULATORS
 - 3.1. Concentration of growth regulators inside the cell
 - 3.2. Growth regulator metabolism
 - 3.3. Interactions with specific receptors
 - 3.4. Indirect effects
 4. CONCLUDING REMARKS
5. NITROGEN NUTRITION - E.G. Kirby, T. Leustek, and M.S. Lee 67
1. INTRODUCTION: NITROGEN NUTRITION OF PLANT CELL CULTURES
 2. PATHWAYS OF NITROGEN ASSIMILATION
 - 2.1. Nitrate reduction
 - 2.1.1. Nitrate reductase
 - 2.2. Ammonium assimilation
 - 2.2.1. Glutamate dehydrogenase
 3. NUTRITIONAL REQUIREMENTS: TISSUE AND CELL CULTURE APPLICATIONS
 - 3.1. Inorganic nitrogen
 - 3.2. Organic nitrogen
 - 3.2.1. Amino acids
 - 3.2.2. Urea
 - 3.2.3. Ureides
 - 3.2.4. Polyamines
 - 3.3. Complex substances
6. METABOLIC AND NON-METABOLIC ROLES OF CARBOHYDRATES - M.R. Thompson, and T.A. Thorpe 89
1. INTRODUCTION
 2. SHOOT INITIATION
 - 2.1. Exogenous carbohydrate requirements
 - 2.2. Endogenous carbohydrate requirements
 - 2.2.1. Metabolic role of carbohydrates
 - 2.2.2. Non-metabolic role of carbohydrates
 3. SHOOT ELONGATION
 4. ROOT INITIATION AND DEVELOPMENT
 5. EMBRYOGENESIS
 6. CYTODIFFERENTIATION
 7. NON-DIFFERENTIATING SYSTEMS
 8. CONCLUSIONS
7. POLYAMINES - N. Bagni, and S. Biondi 113
1. INTRODUCTION
 2. POLYAMINES IN PLANT GROWTH AND DIFFERENTIATION AND INTERACTION WITH OTHER PHYTOHORMONES
 3. CONCLUSIONS

8. PH OF THE MEDIUM AND THE GROWTH AND METABOLISM OF CELLS IN CULTURE - S.C. Minocha 125
1. INTRODUCTION
 2. MEASUREMENT OF CELLULAR PH
 3. EFFECT OF EXTERNAL PH ON CYTOPLASMIC PH
 4. CHANGES IN PH OF THE GROWTH MEDIUM DURING CELL CULTURE
 5. EFFECTS OF PH ON GROWTH AND METABOLISM
 - 5.1. Nutrient precipitation
 - 5.2. Nutrient uptake
 - 5.3. Plant hormone uptake
 - 5.4. Optimal pH
 - 5.5. Effects on morphogenesis
 6. POSSIBLE EXPLANATIONS FOR CHANGES IN PH OF THE MEDIUM
 7. CONCLUSIONS
9. TEMPERATURE - V. Chalupa 142
1. INTRODUCTION
 2. INCUBATION TEMPERATURE
 3. EFFECTS OF TEMPERATURE ON TISSUE CULTURE GROWTH
 4. EFFECTS OF TEMPERATURE ON ORGANOGENESIS
 5. EFFECTS OF LOW TEMPERATURE
 6. CONCLUSION
10. VITRIFICATION: MORPHOLOGICAL, PHYSIOLOGICAL, AND ECOLOGICAL ASPECTS - Th. Gaspar, C. Kevers, P. DeBergh, L. Maene, M. Paques, and Ph. Boxus 152
1. INTRODUCTION
 - 1.1. General definition
 - 1.2. Apparent causes and remedies
 2. PHYSIOLOGICAL AND BIOCHEMICAL EVENTS LEADING TO VITRIFICATION
 - 2.1. Biochemical deviations
 - 2.1.1. Water content
 - 2.1.2. Cell wall components
 - 2.1.3. Enzymes related to lignification; phenols
 - 2.1.4. Chlorophylls and photosynthesis
 - 2.1.5. Growth regulators
 - 2.2. Hypothetical sequence of reactions leading to vitrification
 3. ECOLOGICAL ASPECTS OF VITRIFICATION
 - 3.1. Limitations of the terminology
 - 3.2. The role of agar quality and concentration
 - 3.3. The role of relative humidity in the culture atmosphere
 4. MORPHOLOGICAL AND BIOCHEMICAL ASPECTS OF VITRIFICATION IN APPLE ROOTSTOCK M.26

CLONAL PROPAGATION

11. TESTING AND DEVELOPMENT OF GENETICALLY ENGINEERED TREES - W.J. Libby 167
1. INTRODUCTION
 - 1.1. What is meant by "genetically engineered", "testing" and "deployment"?

- 1.2. Some preliminary questions
 - 2. TESTING
 - 2.1. General considerations
 - 2.1.1. Genetic variation within entry units
 - 2.1.2. Environmental variation within and between test sites
 - 2.1.3. The number of entries in a test
 - 2.1.4. The location, preparation and care of test sites
 - 3. CLONAL TESTING
 - 3.1. Sensitivity to broad-sense heritability
 - 3.2. Sensitivity to proportion and number of clones selected
 - 3.3. Optimum numbers of test ramets per clone
 - 3.4. Large contiguous plots vs. non-contiguous or single tree plots
 - 3.5. Typical vs. atypical sites
 - 3.6. Possibility of testing for competitive compatibility
 - 4. SPECIAL CONSIDERATIONS FOR GENETICALLY ENGINEERED TREES
 - 4.1. The relationship of genetic novelty and test stringency
 - 4.1.1. Two stories
 - 4.2. The heritability of genetically engineered characteristics
 - 4.3. The stability of somaclonal variation
 - 4.4. Propagule comparability
 - 5. GENERAL DEPLOYMENT STRATEGIES
 - 5.1. Provenances
 - 5.2. Unusual sites
 - 6. CLONAL DEPLOYMENT STRATEGIES
 - 6.1. Numbers of clones per locale
 - 6.2. General-purpose vs. interactive clones
 - 6.3. Wimps vs. moms
 - 7. SPECIAL STRATEGIES FOR GENETICALLY ENGINEERED TREES
 - 7.1. Minority mixes
2. POTENTIAL GENETIC GAIN THROUGH TISSUE CULTURE - R. Timmis, M.M. Abo El-Nil, and R.W. Stonecypher 198
- 1. INTRODUCTION
 - 2. TREE IMPROVEMENT TODAY
 - 2.1. Typical programs
 - 2.2. Genetic gain and constraints
 - 3. APPLICATION OF TISSUE CULTURE
 - 3.1. Present advantages and limitations of vegetative propagation
 - 3.2. Timing of genetic gain and practical aspects
 - 4. FUTURE DEVELOPMENTS
 - 4.1. Maximizing broad-sense heritability
 - 4.2. In vitro selection
 - 5. CONCLUSIONS
3. JUVENILITY AND MATURITY - W.P. Hackett 216
- 1. INTRODUCTION
 - 2. DESCRIPTION AND DEVELOPMENTAL BASIS OF PHASE CHANGE
 - 3. STABILITY OF JUVENILE AND MATURE MERISTEMS
 - 3.1. Cellular
 - 3.2. Structural and organizational
 - 3.3. Correlative

14. REJUVENATION - A. Franclet, M. Boulay, F. Bekkaoui, Y. Fouret, B. Verschoore-Martouzet, and N. Walker 232
1. INTRODUCTION
 2. PROGRESSIVE REJUVENATION BY HORTICULTURAL TREATMENTS
 3. IN VITRO CULTURE AS A REJUVENATION TECHNIQUE
 4. IN VITRO REJUVENATION OF SEQUOIA: A POSSIBLE MODEL FOR OTHER SPECIES
 5. DISCUSSION
 6. CONCLUSION
15. CLONAL PROPAGATION OF MATURE TREES: PROBLEMS AND POSSIBLE SOLUTIONS - J.M. Bonga 249
1. WHY CLONAL PROPAGATION OF MATURE TREES
 2. JUVENILITY, MATURITY, AND REJUVENATION
 - 2.1. Location of juvenile tissue in mature trees
 - 2.2. Pretreatments
 - 2.3. Physiological and genetic factors
 3. TECHNIQUES PRESENTLY APPLICABLE
 - 3.1. Collection of juvenile tissues
 - 3.2. Explant size
 - 3.3. Avoidance of determined tissues as explant source
 - 3.4. Adjustment of cultural conditions
 4. VARIATION IN RELATION TO THE JUVENILE-MATURE GRADIENT
 5. SUMMARY AND CONCLUSIONS
- GENETIC VARIATION AND ULTRASTRUCTURE
16. SOMACLONAL VARIATION - M.R. Ahuja 272
1. INTRODUCTION
 2. TERMINOLOGY
 3. GENERAL ASPECTS
 4. GENETIC BASIS OF SOMACLONAL VARIATION
 5. SOMACLONAL VS GAMETOCLOAL VARIATION
 6. MECHANISMS OF SOMACLONAL VARIATION
 7. SOMACLONAL VARIATION IN FOREST TREES
 8. FUTURE OUTLOOK
17. MEASUREMENT AND ORIGIN OF GENETIC VARIATION IN TISSUE CULTURE SYSTEMS - D.E. Parfitt, and S. Arulsekhar 286
1. INTRODUCTION
 2. ISOZYME VARIATION
 3. CHROMOSOME VARIABILITY
 4. MORPHOLOGICAL VARIATION
 5. RESTRICTION FRAGMENT LENGTH POLYMORPHISM
 6. OTHER VARIATION
 7. ORIGIN OF VARIATION
 8. SUMMARY
18. DNA IN TREE SPECIES - S.S. Dhillon 298
1. INTRODUCTION

- 2. PROCEDURES
 - 2.1. Cytophotometry
 - 2.2. Flow cytometry
 - 2.3. DNA extraction
 - 2.4. Analysis of the DNA composition
 - 2.4.1. Thermal denaturation
 - 2.4.2. Buoyant density determination
 - 2.4.3. Reassociation kinetics
 - 3. SPECIFIC FINDINGS
 - 3.1. DNA amount determinations
 - 3.2. Base composition
 - 3.3. Reassociation kinetics
19. APPLICATION OF RECOMBINANT DNA TECHNIQUES TO PINES: A MOLECULAR APPROACH TO GENETIC ENGINEERING IN FORESTRY - R. Sederoff, A. Stomp, B. Gwynn, E. Ford, C. Loopstra, P. Hodgskiss, and W.S. Chilton 314
- 1. INTRODUCTION
 - 2. RECOMBINANT DNA TECHNOLOGY
 - 3. PURIFICATION OF DNA FROM FOREST TREE SPECIES
 - 4. MOLECULAR HYBRIDIZATION ANALYSIS OF PINE DNA
 - 5. THE PINE RIBOSOMAL RNA GENES HAVE A LARGE SPACER
 - 6. LENGTH OF THE REPEAT UNIT FOR THE 5S RIBOSOMAL GENES IN PINES
 - 7. RESTRICTION FRAGMENT LENGTH POLYMORPHISM BETWEEN PINE SPECIES FOR rRNA GENES
 - 8. MOLECULAR HYBRIDIZATION TO ORGANELLAR GENES IN LOBLOLLY PINE
 - 9. DNA CLONING IN PINES
 - 10. SEQUENCE OF IFG1-14 AND IFG1-16 DNA
 - 11. DNA TRANSFER IN LOBLOLLY PINE
 - 12. THE MAJOR BARRIER TO GENETIC ENGINEERING IN CONIFERS IS REGENERATION OF PLANTS FROM CELLS
20. CYTOGENETIC MANIPULATIONS IN FOREST TREES THROUGH TISSUE CULTURE - S.E. Schlarbaum 330
- 1. INTRODUCTION
 - 2. SUBJECT REVIEW
 - 2.1. Chromosome-mediated gene transfer
 - 2.1.1. Mammalian species
 - 2.1.2. Plant species
 - 2.2. Microcell-mediated gene transfer
 - 2.2.1. Mammalian species
 - 2.2.2. Plant species
 - 2.3. Cytometric fractionation of chromosomes
 - 2.3.1. Mammalian species
 - 2.3.2. Plant species
 - 2.4. Status of forest tree tissue culture and cytogenetic research
 - 3. POTENTIAL APPLICATIONS
 - 3.1. Somatic cell genetics
 - 3.2. In vitro genetic manipulations for tree improvement

3.2.1. Transfer of genes and chromosomes	
3.2.2. Synthesis of multi-parent trees and cybrids	
3.3. Closing remarks	
21. DEVELOPMENTAL ULTRASTRUCTURE IN GYMNASPERMS - T.C. Pesacreta, and M.V. Parthasarathy	353
1. INTRODUCTION	
2. RESULTS AND DISCUSSION	
2.1. Microfilaments	
2.2. Vacuoles	
2.3. Nuclei	
2.4. Spiny vesicles	
3. CONCLUSIONS	
22. DO MITOCHONDRIA MEDIATE ORGANOGENESIS? - F. Bernard-Durix, and A. Koor	372
1. INTRODUCTION	
2. PHYTOHORMONAL REGULATION OF ORGANOGENESIS	
3. THE SEARCH FOR MODULATING MECHANISMS	
4. IMPLICATIONS OF THE SIZE AND ORGANIZATION OF PLANT MITOCHONDRIAL DNA	
5. PHYTOHORMONAL INFLUENCE ON mtDNA SYNTHESIS	
5.1. Preferential synthesis	
5.2. Transient "amplification"	
5.3. Localization of preferential synthesis	
6. MITOCHONDRIO-NUCLEAR PROGRESSION OF ORGANOGENETIC CONTROL	
7. CONCLUDING HYPOTHESES	
23. STRUCTURE OF CELL ORGANELLES AND CELL WALL IN TISSUE CULTURES OF TREES - L.K. Simola	389
1. INTRODUCTION	
2. CASE STUDIES: GYMNASPERMS	
2.1. <u>Araucaria araucana</u> , megagametophyte callus	
2.2. <u>Ginkgo biloba</u> , pollen and megagametophyte derived callus	
2.3. <u>Picea abies</u> , microspore and megagametophyte callus	
2.4. <u>Picea glauca</u> , suspension cultures of hypocotyl origin	
2.5. <u>Pinus contorta</u> , suspension culture	
2.6. <u>Pinus pinea</u> , callus from leaf explants	
3. CASE STUDIES: ANGIOSPERMS	
3.1. <u>Acer pseudoplatanus</u> , suspension cultures	
3.2. <u>Alnus glutinosa</u> and <u>A. incana</u> , callus of leaf origin	
3.3. <u>Betula pendula</u> , microspore and leaf callus	
4. COMPARATIVE ULTRASTRUCTURAL MORPHOLOGY	
4.1. Nucleus	
4.2. Plastids	
4.3. Mitochondria	
4.4. Microbodies and crystalline bodies	
4.5. Endoplasmic reticulum and ribosomes	
4.6. Dictyosomes and microtubules	
4.7. Plasmalemma and plasmalemmasomes	
4.8. Vacuoles	
4.9. Cell wall	
5. CONCLUSION	
Tree species index	419
General index	421
