Transportation Technologies for Sustainability
This volume collects selected topical entries from the *Encyclopedia of Sustainability Science and Technology* (ESST). ESST addresses the grand challenges for science and engineering today. It provides unprecedented, peer-reviewed coverage of sustainability science and technology with contributions from nearly 1,000 of the world’s leading scientists and engineers, who write on more than 600 separate topics in 38 sections. ESST establishes a foundation for the research, engineering, and economics supporting the many sustainability and policy evaluations being performed in institutions worldwide.

**Editor-in-Chief**

**ROBERT A. MEYERS**, RAMTECH LIMITED, Larkspur, CA, USA

**Editorial Board**

**RITA R. COLWELL**, Distinguished University Professor, Center for Bioinformatics and Computational Biology, University of Maryland, College Park, MD, USA

**ANDREAS FISCHLIN**, Terrestrial Systems Ecology, ETH-Zentrum, Zürich, Switzerland

**DONALD A. GLASER**, Glaser Lab, University of California, Berkeley, Department of Molecular & Cell Biology, Berkeley, CA, USA

**TIMOTHY L. KILLEEN**, National Science Foundation, Arlington, VA, USA

**HAROLD W. KROTO**, Francis Eppes Professor of Chemistry, Department of Chemistry and Biochemistry, The Florida State University, Tallahassee, FL, USA

**AMORY B. LOVINS**, Chairman & Chief Scientist, Rocky Mountain Institute, Snowmass, USA

**LORD ROBERT MAY**, Department of Zoology, University of Oxford, Oxford, OX1 3PS, UK

**DANIEL L. MCFADDEN**, Director of Econometrics Laboratory, University of California, Berkeley, CA, USA

**THOMAS C. SCHELLING**, 3105 Tydings Hall, Department of Economics, University of Maryland, College Park, MD, USA

**CHARLES H. TOWNES**, 557 Birge, University of California, Berkeley, CA, USA

**EMILIO AMBASZ**, Emilio Ambasz & Associates, Inc., New York, NY, USA

**CLARE BRADSHAW**, Department of Systems Ecology, Stockholm University, Stockholm, Sweden

**TERRY COFFELT**, Research Geneticist, Arid Land Agricultural Research Center, Maricopa, AZ, USA

**MEHRDAD EHSANI**, Department of Electrical & Computer Engineering, Texas A&M University, College Station, TX, USA

**ALI EMADI**, Electrical and Computer Engineering Department, Illinois Institute of Technology, Chicago, IL, USA

**CHARLES A. S. HALL**, College of Environmental Science & Forestry, State University of New York, Syracuse, NY, USA

**RIK LEEMANS**, Environmental Systems Analysis Group, Wageningen University, Wageningen, The Netherlands

**KEITH LOVEGROVE**, Department of Engineering (Bldg 32), The Australian National University, Canberra, Australia

**TIMOTHY D. SEARCHINGER**, Woodrow Wilson School, Princeton University, Princeton, NJ, USA

Bicycle Integration with Public Transport
Bus Rapid Transit and Light Rail Transit Systems: State of Discussion
Bus Rapid Transit, Institutional Issues Related to Implementation
Bus Versus Light Rail Transit: Service Quality, Economic, Environmental, and Planning Aspects
Bus Versus Rail Implications for Transit-Oriented Development
High Speed Rail, Technology Development of
High-Occupancy Vehicle and Toll Lanes
HOT Lanes/Value Pricing: Planning and Evaluation of Multiclass Service
Light Rail Transit in the US and Abroad, Examination of History and Innovations
Light Rail Transit, Shared Infrastructural Issues
Light Rail Transit, Systemic Viability
MAGLEV Technology Development
Mass Transit Science and Technology, Introduction
Personal Rapid Transit and Its Development
Transit-Oriented Development and Land Use
# Table of Contents

3D Pose Estimation of Vehicles Using Stereo Camera
   Björn Barrois, Christian Wöhler .......................................................... 1

AC Machines: Permanent Magnet Synchronous and Induction Machines
   A. H. Ranjbar, Babak Fahimi .............................................................. 25

Active Multifocal Vision System, Adaptive Control of
   Alois Unterholzner, Hans-Joachim Wuensche ........................................ 55

Active Pedestrian Protection System, Scenario-Driven Search Method for
   Alberto Broggi, Pietro Cerri, Stefano Ghidoni, Paolo Grisleri, Ho Gi Jung .... 74

Advanced Public Transport Systems, Simulation-Based Evaluation
   Haris N. Koutsopoulos, Moshe Ben-Akiva .......................................... 100

Batteries, Battery Management, and Battery Charging Technology
   Robert S. Balog, Ali Davoudi ............................................................ 122

Battery Technologies
   Ramakrishnan Mahadevan, Mohit Chhabra, Puneet Pasrich, Frank Barnes .... 158

Bicycle Integration with Public Transport
   John Pucher, Ralph Buehler ............................................................... 196

Bus Rapid Transit and Light Rail Transit Systems: State of Discussion
   Cliff Henke .......................................................................................... 212

Bus Rapid Transit, Institutional Issues Related to Implementation
   Mark A. Miller .................................................................................... 220

   Dario Hidalgo ...................................................................................... 235

Bus Rapid Versus Light Rail Transit: Service Quality, Economic, Environmental and Planning Aspects
   Vukan R. Vuchic, Richard M. Stanger, Eric C. Bruun ................................ 256

Bus Versus Rail Implications for Transit-Oriented Development
   Ming Zhang .......................................................................................... 292

Cooperative Group of Vehicles and Dangerous Situations, Recognition of
   Kym Watson, Christian Frese, Thomas Batz, Jürgen Beyerer ................... 311

Driver Assistance System, Biologically Inspired
   Moustapha Doumiati, Daniel Lechner .................................................. 338

Driver Assistance Systems, Automatic Detection and Site Mapping
   Andreas Wimmer, Klaus C. J. Dietmayer ............................................. 353

Driver Behavior at Intersections
   Toshihisa Sato, Motoyuki Akamatsu .................................................... 368

Driver Characteristics Based on Driver Behavior
   Jianqiang Wang, Lei Zhang, Xiaojia Lu, Keqiang Li ................................. 385
